***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-3 and 20, drawn to a data medium, classified in Class 493, subclass 323.

II. Claims 4-10 and 21, drawn to printing plate, classified in class 101, subclass 395.

III. Claims 11-19 and 22, drawn to a process of making a printing plate, classified in class 101, subclass 483.

Inventions Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions is that the data medium of Group I does not required to be printed by the invention of Group II and they have different modes of operation and different functions.

Inventions Group I and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions is that the data medium of Group I cannot be made by the process of Group III and they have different modes of operation.

Art Unit: 2854

Inventions of Group II and Group III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process of Group III can be use to make a plaque.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
